

Mastering SAP Testing Complexity without Disruption

19th April 2020

Mikael Forsberg – SAP Head of Platform & Technologies

Richard Hurst – Tricentis Senior Solution Architect

Agenda

- SAP Partnership
- Change Impact Analysis
- Case Study
 - Challenges & Solution
 - Results
 - Business Case
- Questions

Why SAP Chose Tricentis as Its Official Testing Solution

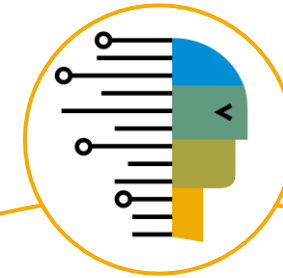

The Global Leader in Enterprise Testing Solutions

- 1** Leader in Gartner Magic Quadrant
- 2** Proven Results in the World's Biggest Brands
- 3** Versatile Platform for Customers at Any Stage of SAP Modernization

Enterprise-Grade Platform for SAP Testing and Beyond

- 4** Model-Based Automation for Resiliency and Scalability
- 5** Risk-Based Approach That Minimizes Business Downtime
- 6** Seamless Integrations for SAP and Non-SAP Testing

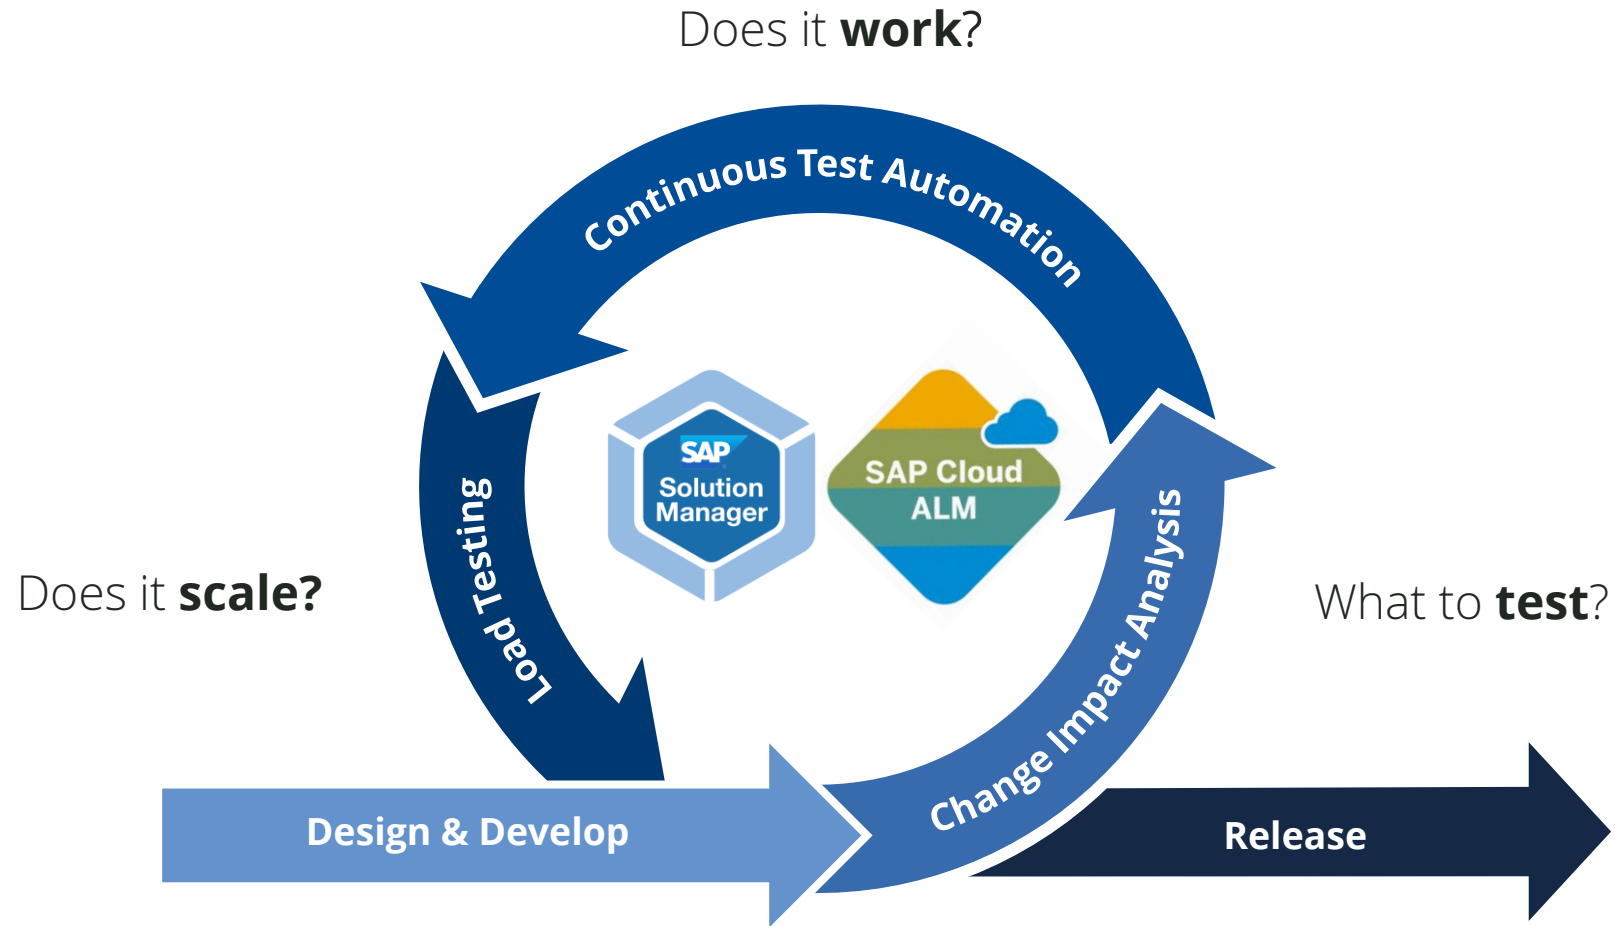

Modern, AI-Driven Technology for Easy Adoption

- 7** AI-driven Impact Analysis for Fast, Safe Changes
- 8** Cloud-Based Architecture
- 9** No-Code, Business Friendly Platform for Easy Adoption

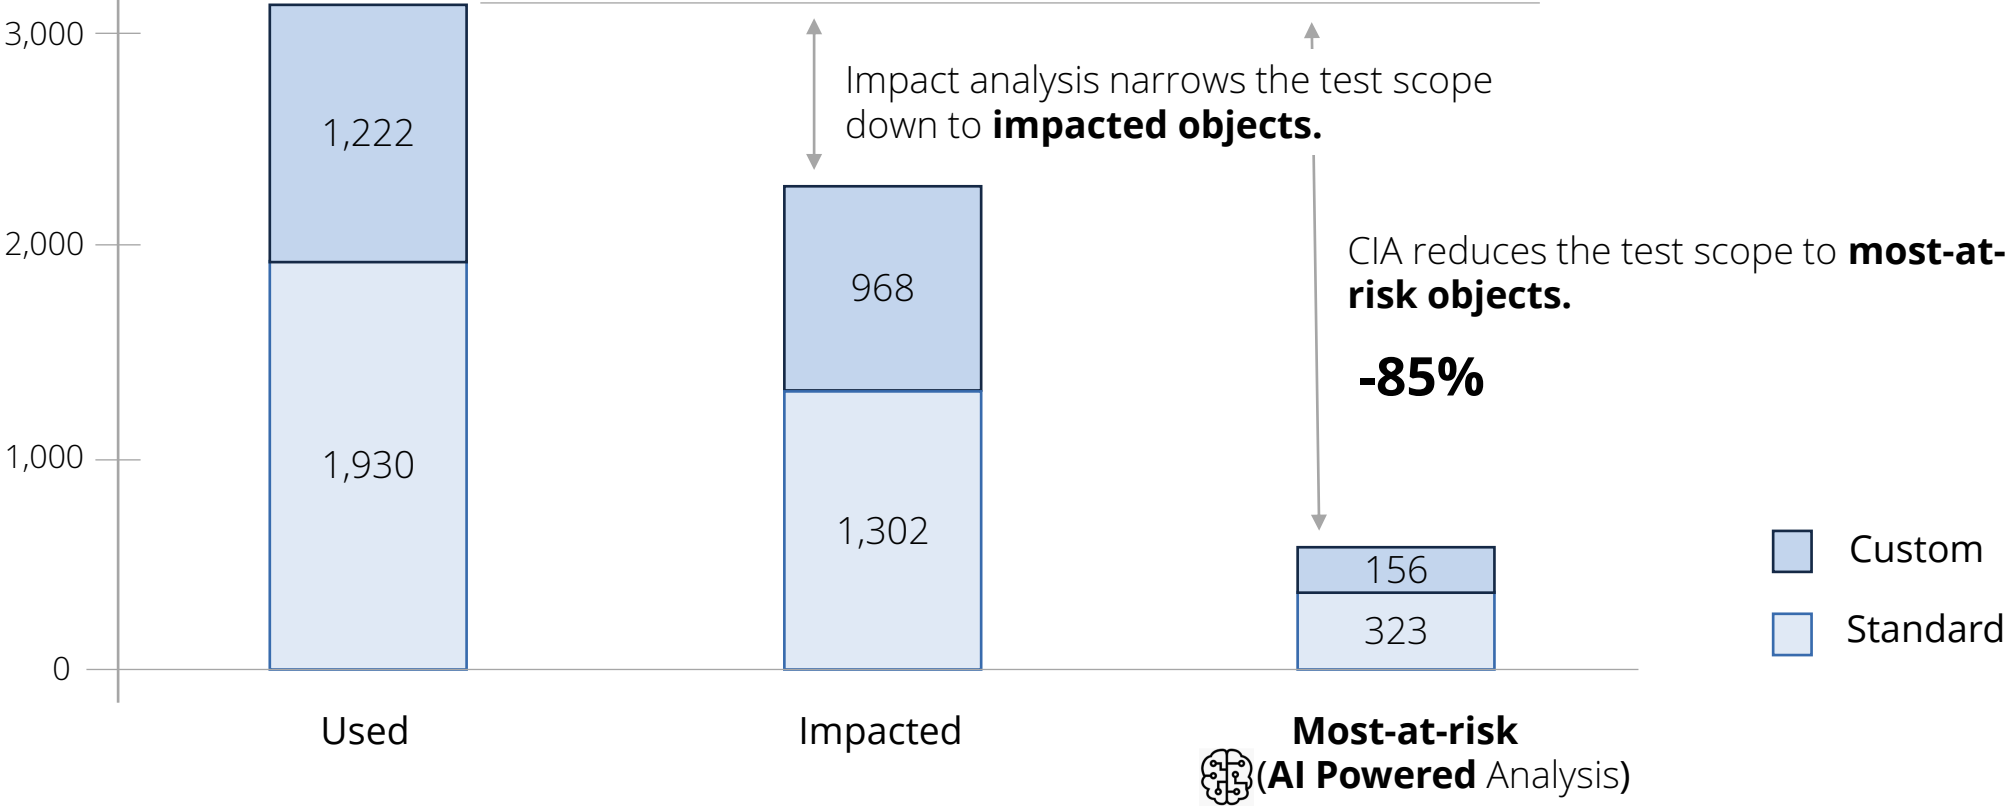

Strategic Partnership with

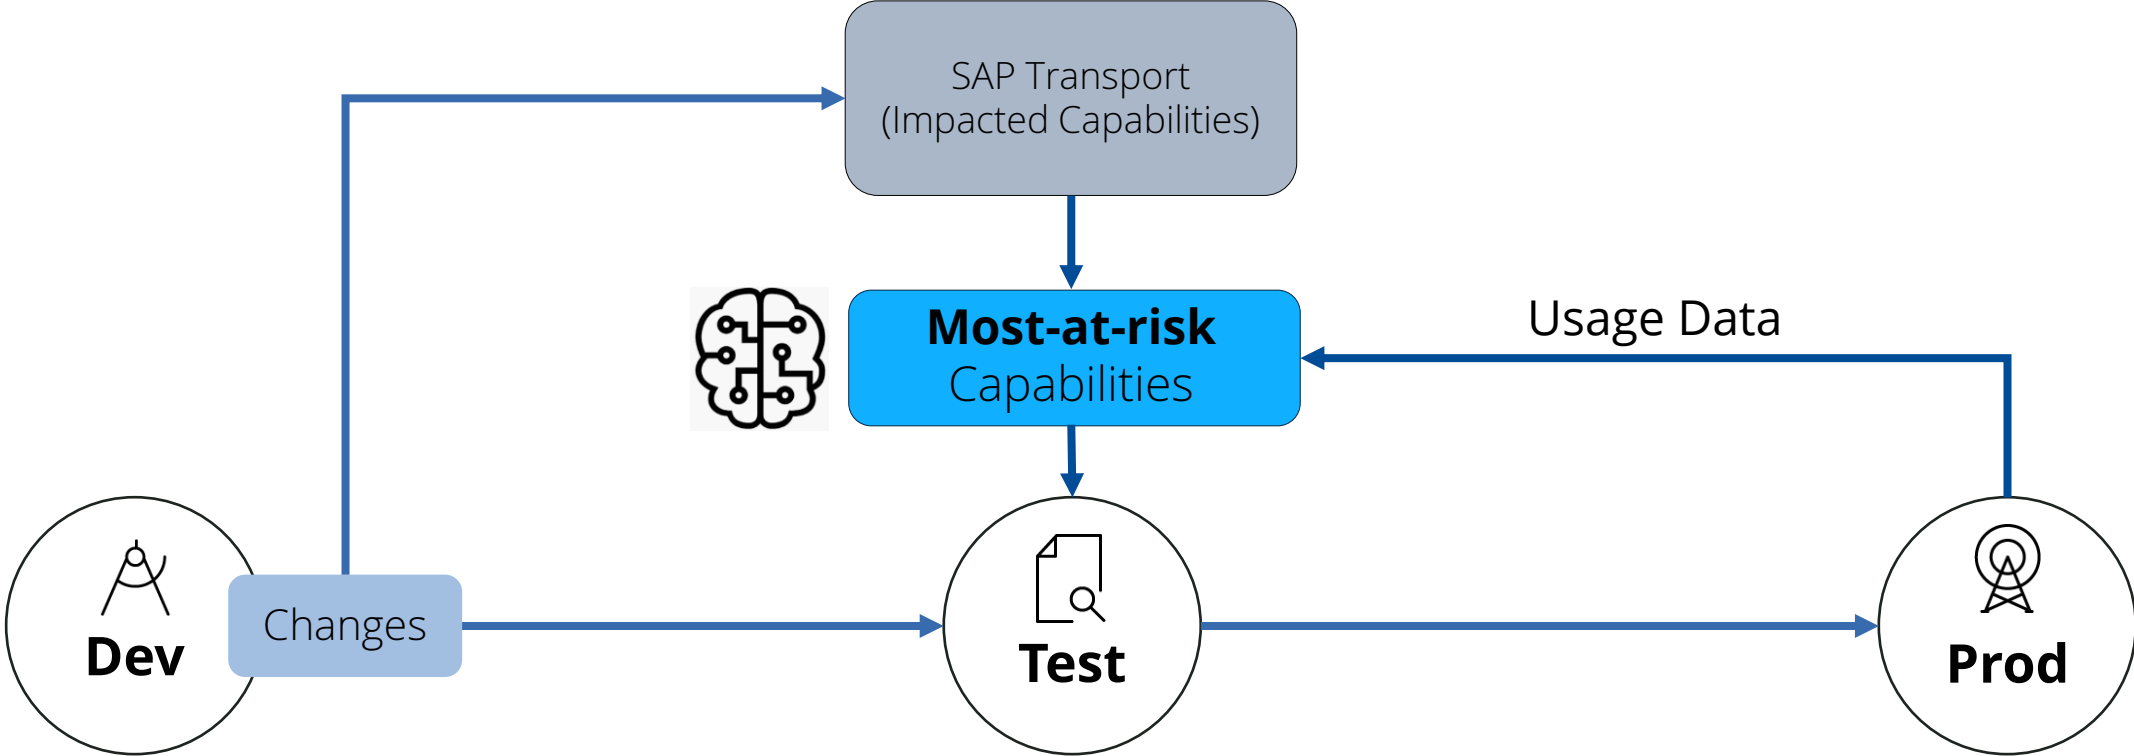

Why Change Impact Analysis ?

Objects used in SAP System

Closing the DevOps Loop

Challenges

Heavily Reliant on Business Users for Testing

Not necessarily testing the right processes

Unfocused Testing

Poor Quality

Expensive Hypercare

Fixing defects in production

Challenges

Heavily Reliant on Business Users for Testing

Not necessarily testing the right

Unfocused Testing

Poor Quality

Emergency hypercare

Fixing defects in production

Slow Release Cadence

Challenges

Testers are focused on what to test

Reduced effort

Testing the Most-at-Risk processes

Increases Quality

De-risks releases and Eliminate Hypercare

No business disruption

Challenges

Testers are focused on what to test

fort

Testing the Most at Risk processes

Increases Quality

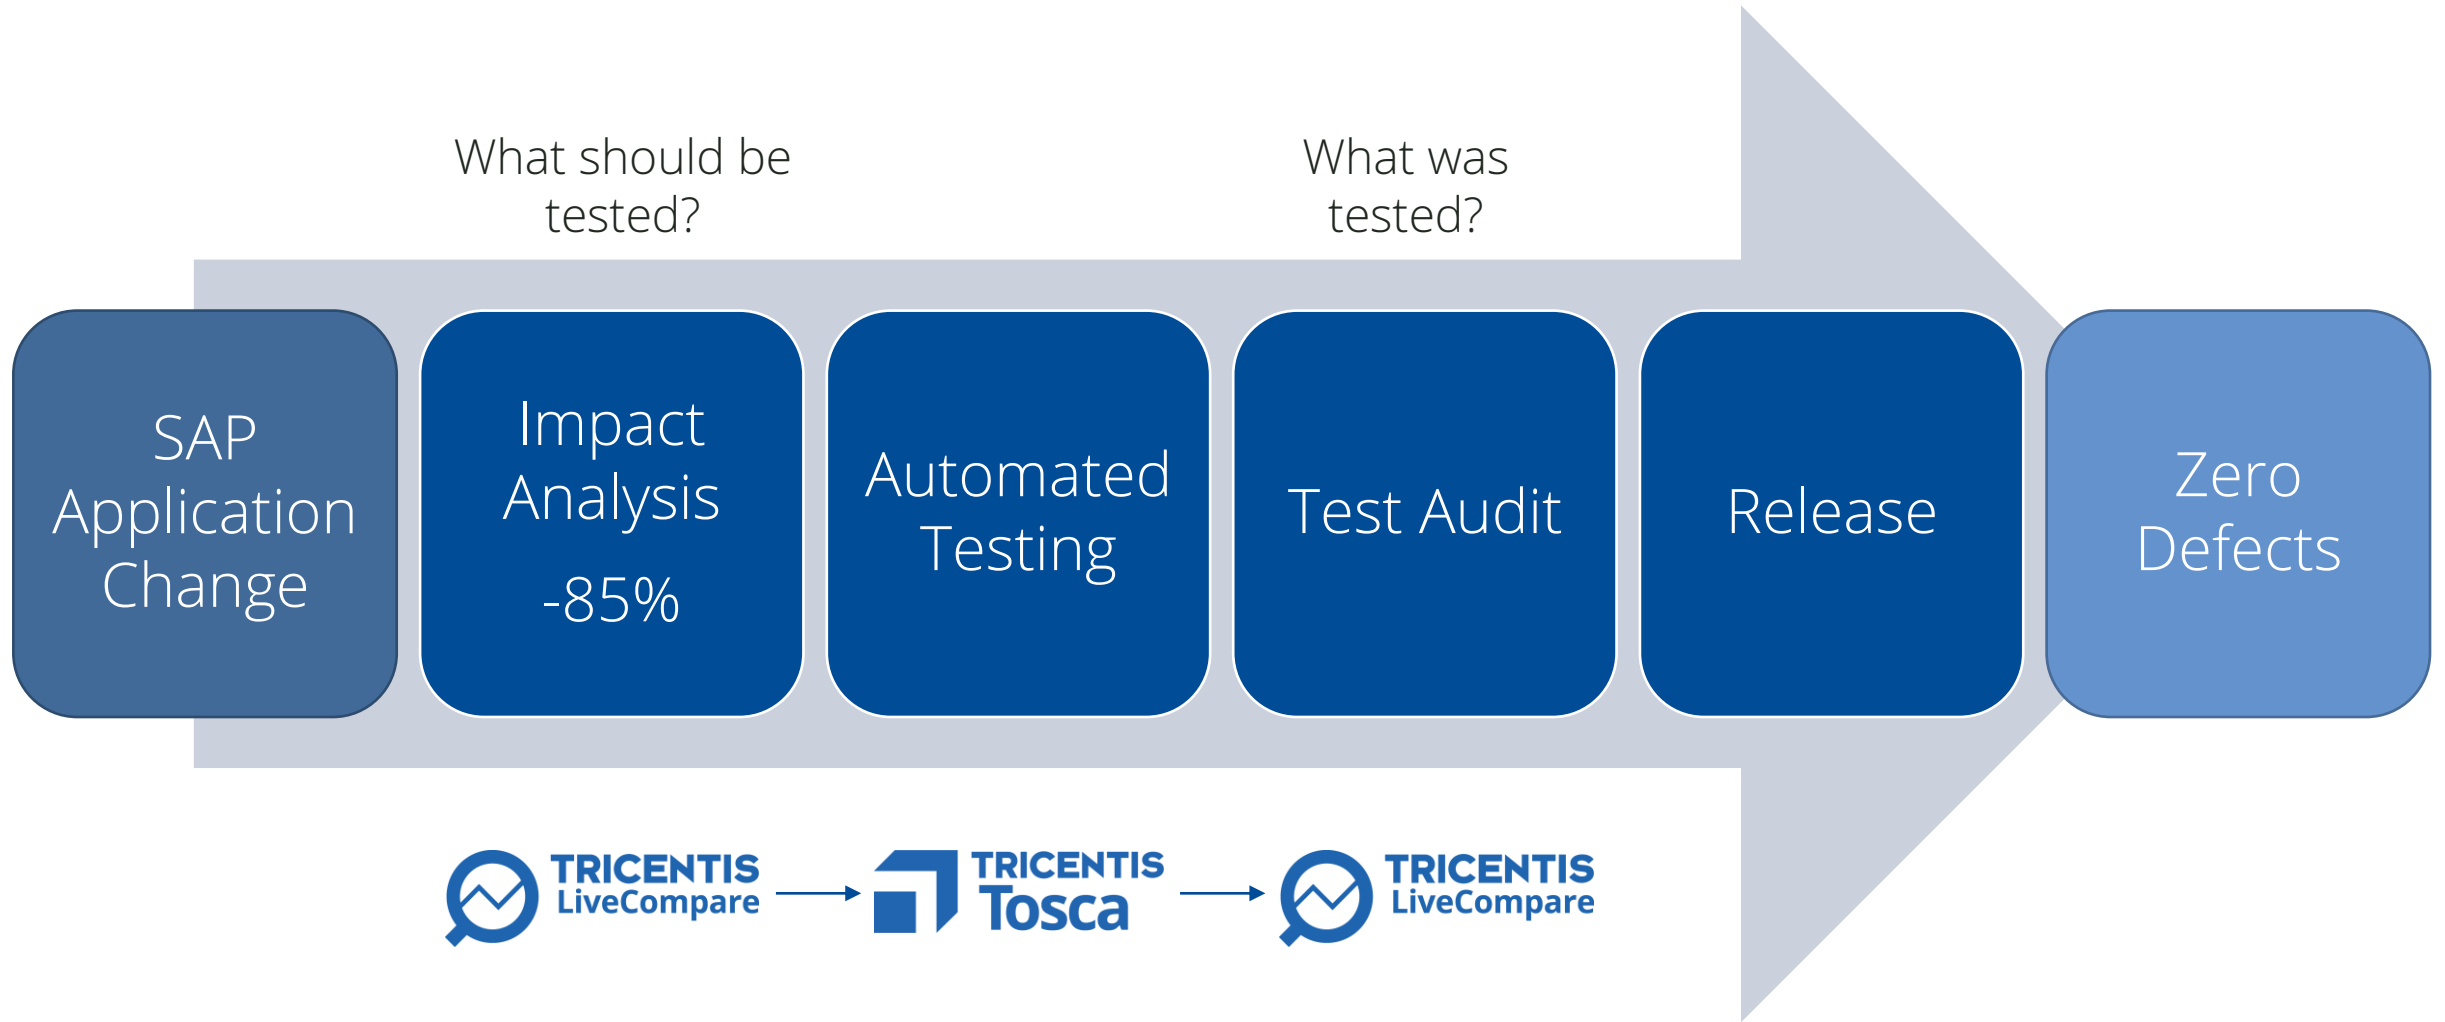

Eliminate and hypercare

No business disruption

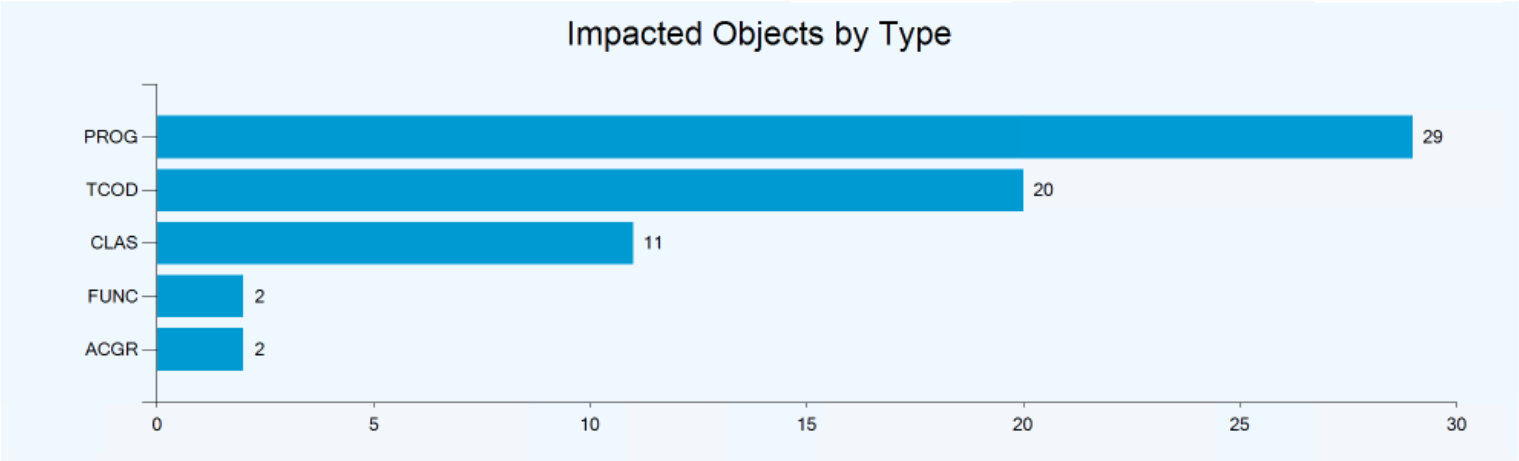

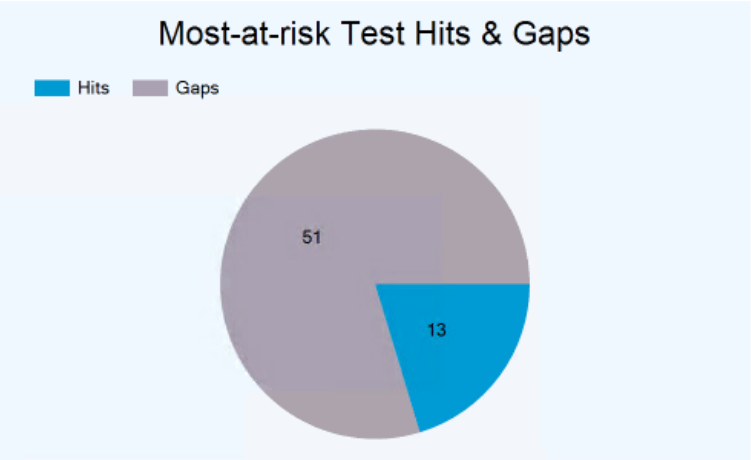

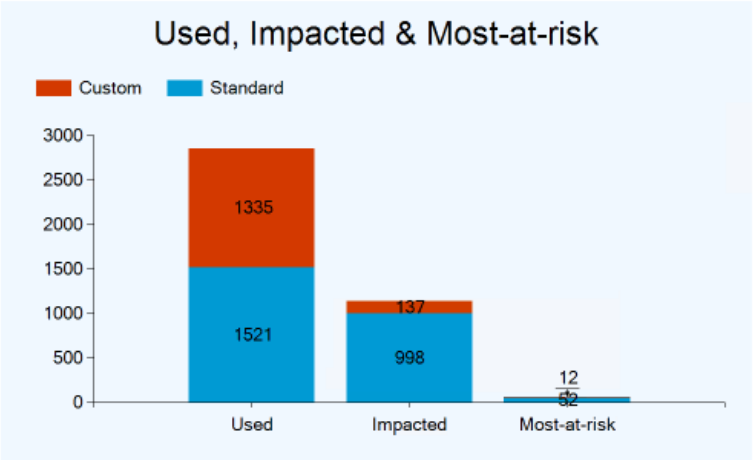

Increase in Releases

AI-driven Continuous Testing for SAP
