# Start Running

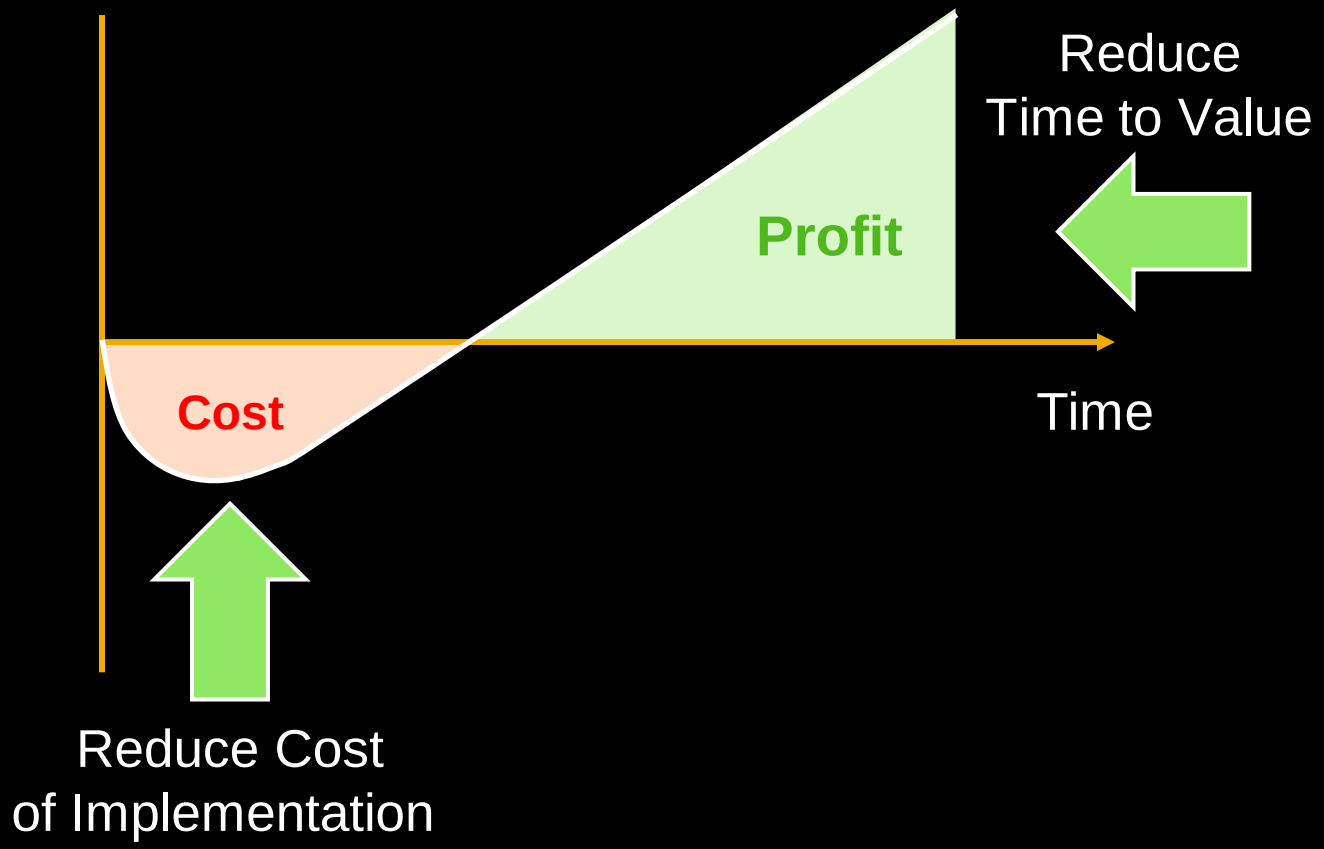
# Start Running

Speed up innovation

**Accelerate Time to Value and**

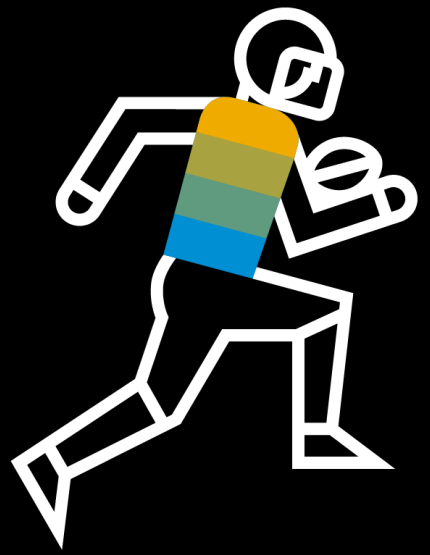
**Reduce Cost of Implementation**

- Leverage pre-configuration
- Follow agile implementation approach
- Only test what matters
- Accelerate test management and execution
- Automate tasks
- Avoid custom code



© 2021 SAP SE or an SAP affiliate company. All rights reserved. I PUBLIC

# Keep Running



# Keep Running

Ensure efficient IT operations

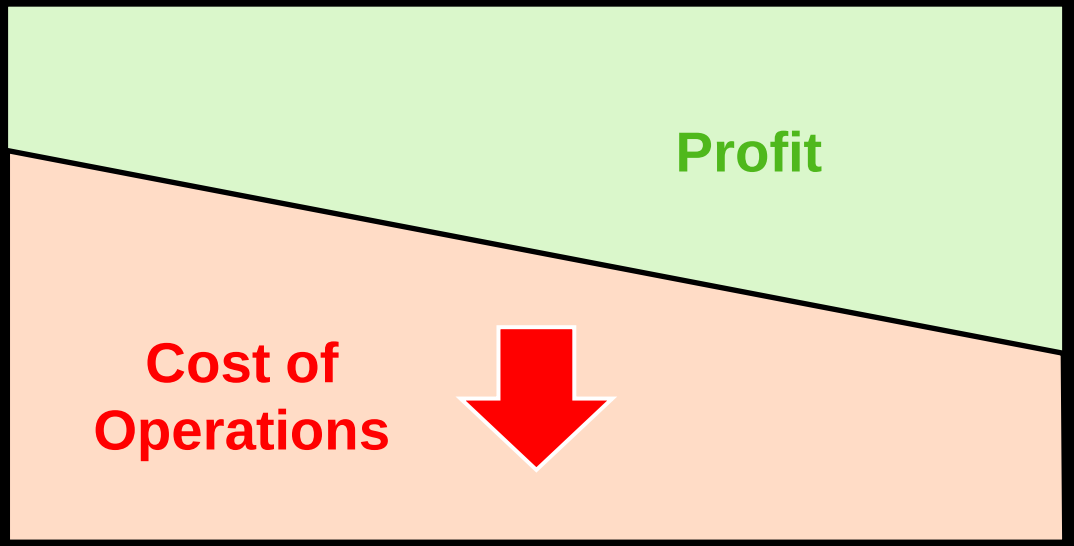
## Ensure Business Continuity

- Analyze risks
- Detect problems pro-actively
- Accelerate problem resolution
- Improve business operations

## Reduce Cost of Operations

- Apply best practices
- Standardize processes
- Centralize operations
- Automate processes

The average cost of 1 minute downtime is more than 5,000 US$ (including production loss) *)



Reduce cost of operations to have more budget for value-generating projects

# SAP Cloud ALM for Operations

# SAP Cloud ALM for Operations – Value Proposition

**Ensure business continuity in your SAP landscape by monitoring and alerting - Increase operation efficiency by automating operational tasks - Avoid anomalies by proactive problem prediction**

- SAP Cloud ALM empowers customers to **understand healthiness of SAP business solutions**:
  - Provides **full stack monitoring and alerting** covering business processes, integration, users, applications, and cloud service/system healthiness
  - Allows to conduct **root cause analysis** on technical as well as on business process level
  - Acts as **collaboration platform between LOB and IT**
- SAP Cloud ALM enables customer to increase operation efficiency by **automating corrective actions as well as regular operation tasks**
- SAP Cloud ALM helps to **predict anomalies in business process and application operation** by event correlation and learning out of the collected data (AIOPs)
- SAP Cloud ALM provides **transparency regarding availability of business services** including business downtimes, business events and business SLA's

© 2021 SAP SE or an SAP affiliate company. All rights reserved. I PUBLIC

# SAP Cloud ALM for Operations – Available & planned scope in detail

**Business Service Management** - Provides transparency for business service availability including Business Downtime Management, Business Event Calendar, Business SLA Management, and Business Event Management

**Business Process Monitoring** – Focused on Business Process KPI's and documents

**Integration & Exception Monitoring** – Focused on integration flows and integration exceptions

**User & Performance Monitoring** – Focused on performance and usage from users perspective

**Job & Automation Monitoring** – Focused on application aspects as jobs and automation

**Health Monitoring** – Focused on technical health of cloud services and systems

**External monitoring of metrics & events**
Integrated in SAP Cloud ALM

**Intelligent Event Processing**

Central event hub to connect different use cases with each other

Enables event correlation

Is open for inbound and outbound event processing

**Embedded Alert Management**

Calculation of use case specific alerts based on dedicated thresholds

Unified alert handling and follow-up activities

Support of alert grouping and atomic alerts

**Embedded Analytics & Intelligence**

Allows use case specific root cause analysis

Works on real-time/raw data as well as historical/ aggregated data

Includes machine learning and prediction

**Embedded Operation Automation**

Execution of corrective actions triggered by events to reduce mean time to resolution

Support of automated, and semi-automated activities to increase efficiency

Unified API Layer

**External Analytics & Intelligence ***

**Incident Management ***

**Collaboration Management ***

**External Automation Management**

# Focused Build SP8
## S/4HANA Conversion Project Support – Simplification Item Management

**Key improvements:**

- Activities with small efforts that are also related to each other can be merged into one Follow-Up Document.
- Created Requirements or Work Packages can be handed over from the Simplification Item Management application to the Mass Change Application for easier Release / Wave Backlog Planning
- Activities without a Follow-Up Document can be assigned to an already created one. If the assignment to or the creation of a Follow-Up document was done incorrectly a reassignment to a different Follow-Up Document can be done.
- Integration of custom transaction types in addition to Requirements and Work Packages

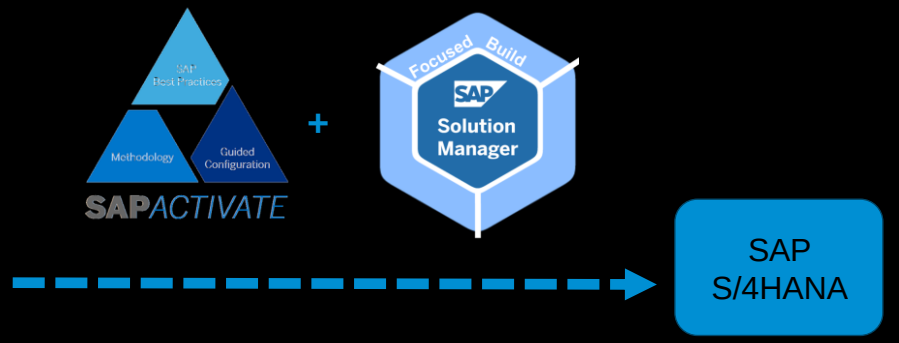
# Key takeaways

## Focused Build

- Is a preconfigured add-on solution for SAP Solution Manager 7.2
- Enables you to jump-start SAP Solution Manager for your innovation project
- Provides a best practice, tool-supported methodology for the requirement-to-deploy process based on proven project processes in an agile project environment
- Perfectly complements the best-practice process content for SAP S/4HANA provided by the SAP Activate methodology and SAP Model Company services

**Fast and cost-efficient implementations based on best-practice process content and methodology**



SAP Solution Manager is the **one and only delivery platform** from SAP to scale the implementation with SAP Activate and SAP Model Company services for **SAP S/4HANA and digital industries.**

# Hybrid operations

# Scope of Application Operations

## System & Application Monitoring

One infrastructure for monitoring and alerting covering SAP & non-SAP applications

- System Monitoring
- User Experience Monitoring
- Integration Monitoring
- Business Intelligence Monitoring

## Root Cause Analysis & Exception Management

Analyze issues in heterogeneous landscapes, ensure compliant configuration and reliable handling of technical and business exceptions

## Technical Administration & Guided Procedures

Automated and guided handling of IT related activities including IT Task Management

- IT Calendar
- Work Mode Management
- Guided Procedure Framework

## Support of Hybrid Landscapes

Central management of customer landscapes that consists of on premise systems as well as public cloud applications

- Integration Monitoring
- Exception Management
- User Experience Monitoring & User Tracing

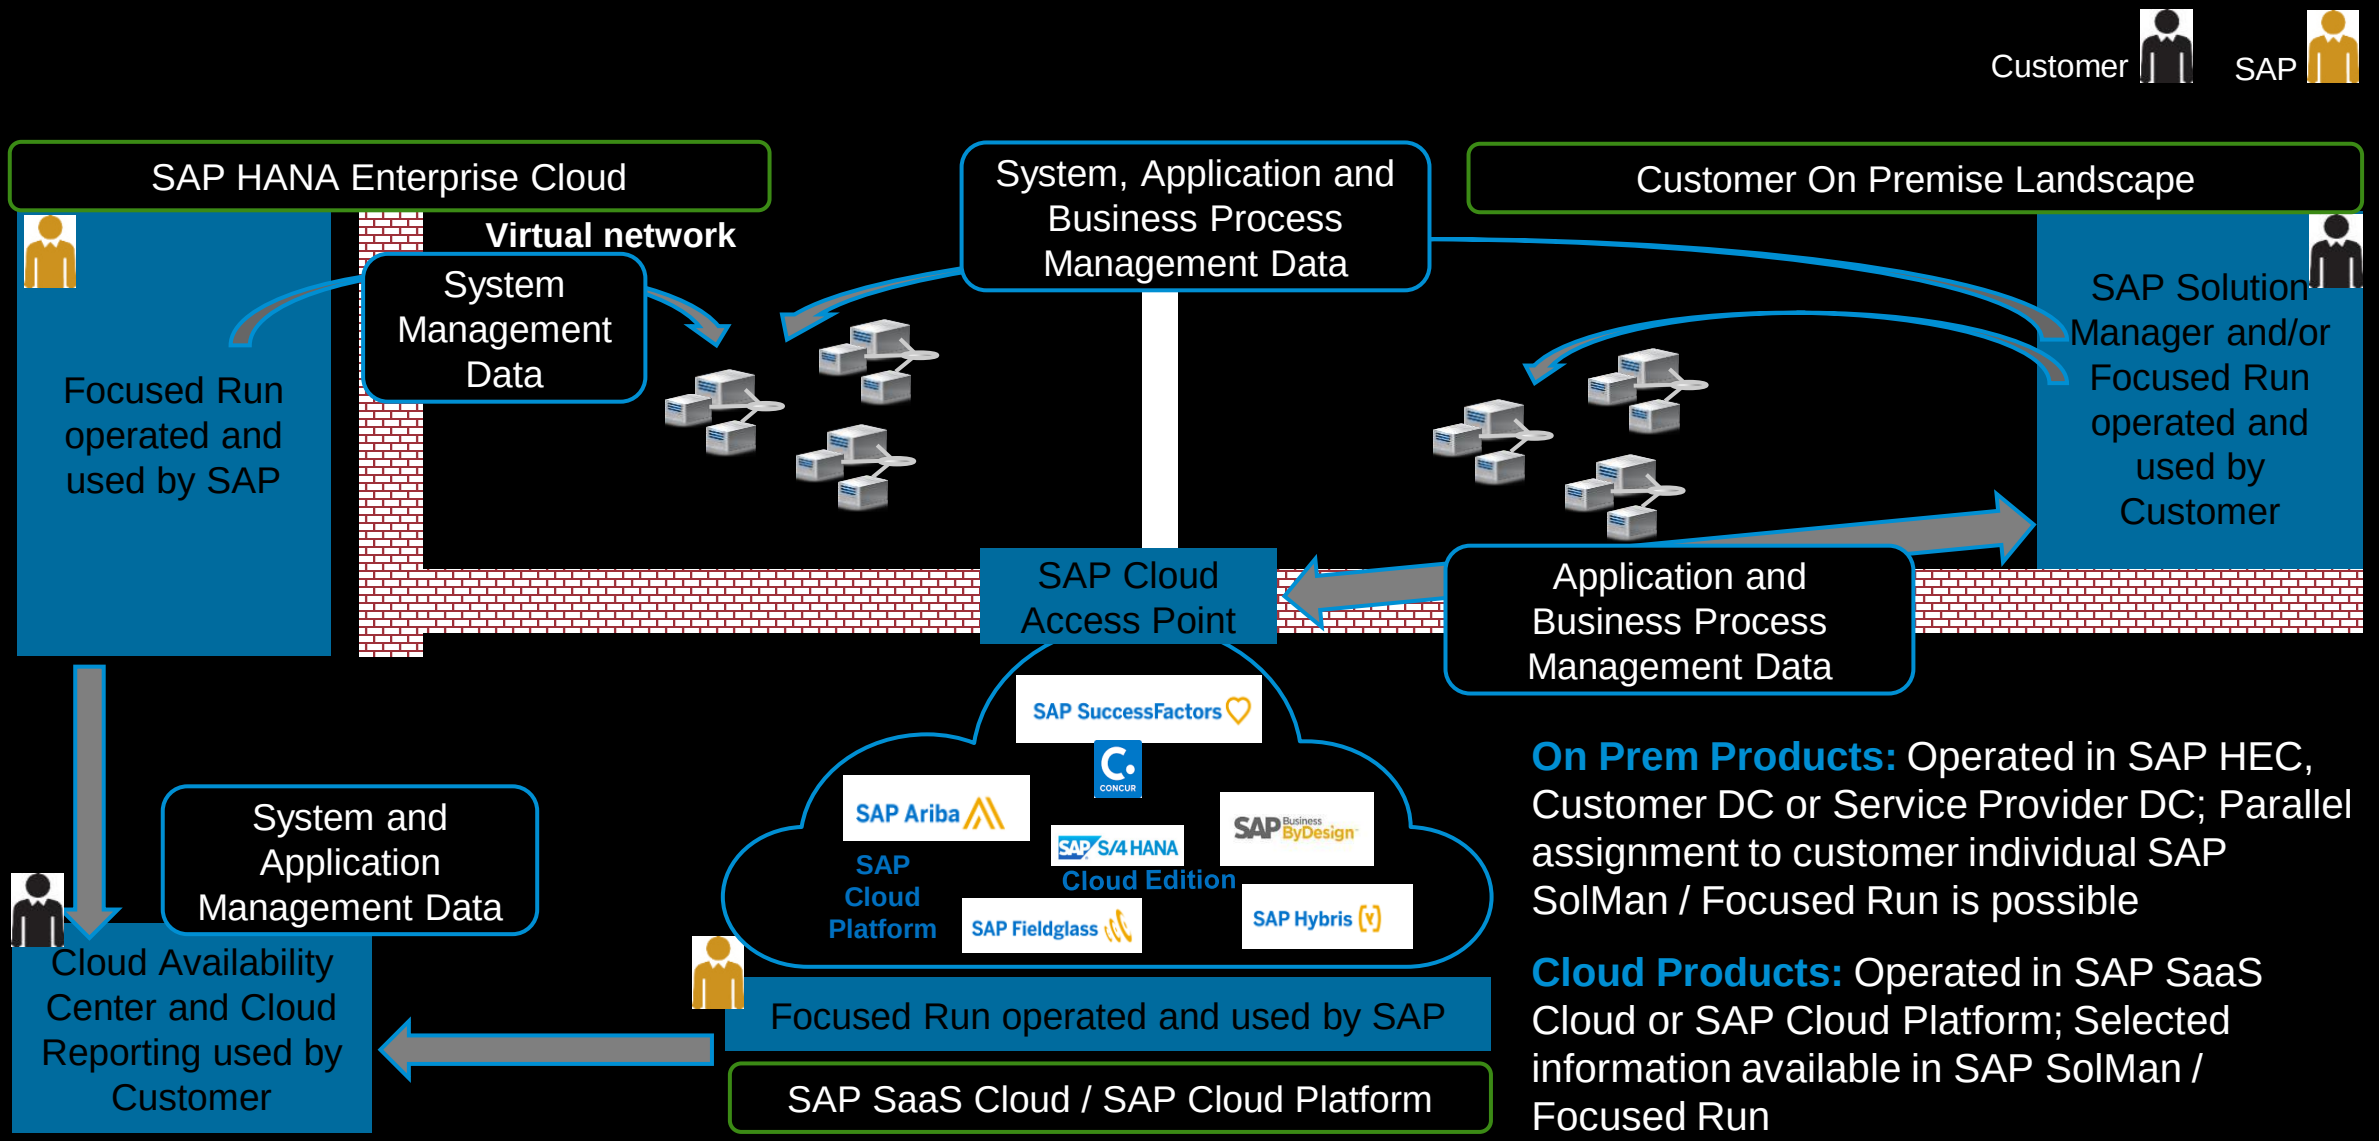
# Operations for Hybrid Landscapes - Overview



**On Prem Products:** Operated in SAP HEC, Customer DC or Service Provider DC; Parallel assignment to customer individual SAP SolMan / Focused Run is possible

**Cloud Products:** Operated in SAP SaaS Cloud or SAP Cloud Platform; Selected information available in SAP SolMan / Focused Run

© 2021 SAP SE or an SAP affiliate company. All rights reserved. I PUBLIC

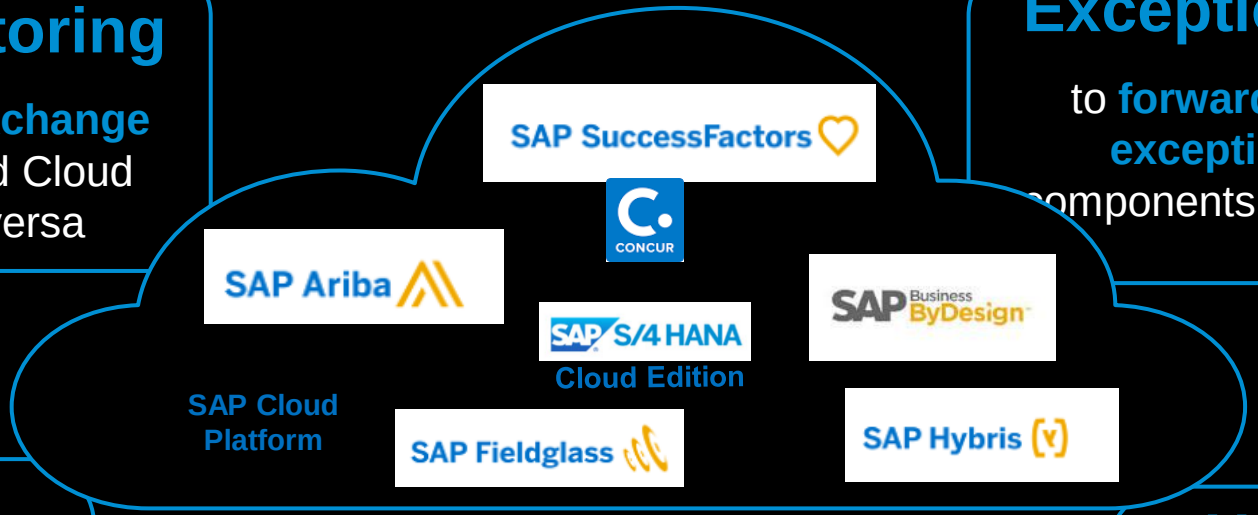
# Support of Hybrid Landscapes - Scope

## Integration Monitoring

to ensure **reliable data exchange between** On Premise and Cloud components and vice versa

## Exception Management

to **forward relevant application exceptions** from SAP Cloud components to Customer On Premise operations



## Data Consistency Management

to ensure **consistency of data** stored in SAP Cloud and Customer On Premise

## Business Process Monitoring

to provide **Business Process KPI's** for SAP Cloud Scenarios

## User Monitoring & User Tracing

to ensure **availability and performance** of SAP Cloud scenarios from **end user perspective**

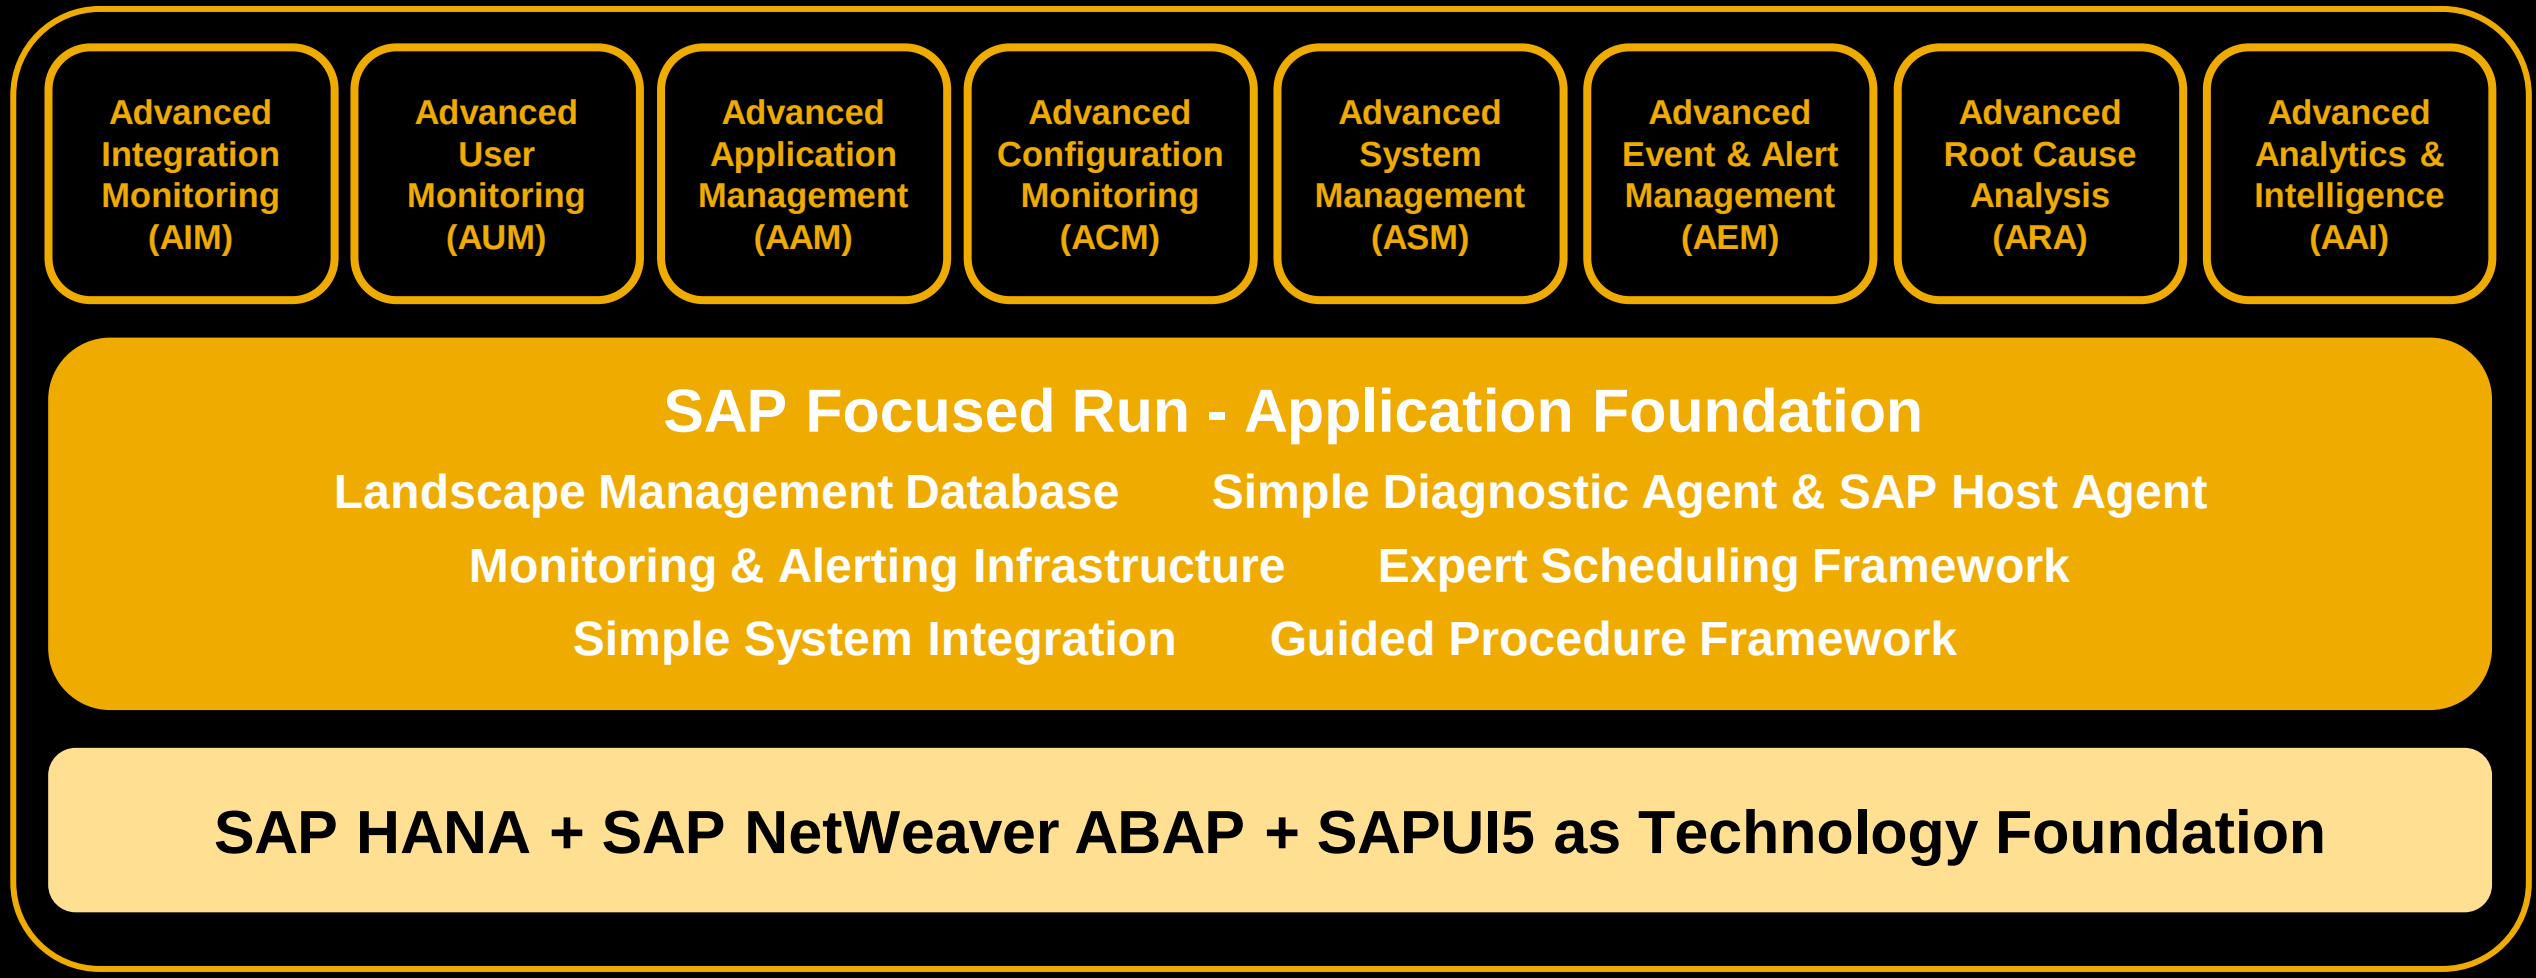
# SAP Focused Run – Use Cases & High Level Architecture



© 2021 SAP SE or an SAP affiliate company. All rights reserved. I PUBLIC

# SAP Focused Run – Scope in detail

**Advanced Integration Monitoring** – Focused on correlation of e2e message flows and integration related exceptions

**Advanced User Monitoring** – Focused on end user performance and utilization based on real as well as synthetic user activities

**Advanced Application Management** – Focused on application aspects as monitoring of application healthiness and jobs as well as service availability, IT calendar and work mode management

**Advanced Configuration Monitoring** – Focused on monitoring of configuration & software changes including validation of security policies

**Advanced System Management** – Focused on monitoring of systems, databases, and hosts as well as EarlyWatch Alert, license management and remote service delivery

**IT Infrastructure Monitoring** – Focused on monitoring of technical infrastructure components (no own visibility in this layer)

## Advanced Alert & Event Management

Calculation of specific alerts based on pre-defined thresholds

Unified alert inbox & alert handling procedures

Use case & cross use case specific horizontal and vertical correlation

## Advanced Root Cause Analysis

Dedicated RCA capabilities as system analysis, trace analysis and file system browser

Works on real-time raw data as well as aggregated historical data

Formalizes collected analysis knowledge to guided RCA

## Operation Automation

Execution of manual or automated actions triggered by alerts to increase resolution efficiency by time reduction

Automation of regular operations tasks to increase operation efficiency and quality

## Advanced Analytics & Intelligence

Provides flexible dashboards for data coming from different use cases (cross use case dashboards)

Uses AI capabilities to derive intelligent decisions

Standardizes open API's for efficient data transfer

# First SAP Cloud ALM adoption step for SAP Solution Manager customers

## Adopt SAP Cloud ALM first for operations:

- Switching operations to SAP Cloud ALM brings an immediate significant reduction of customer effort
- Benefit from an ALM solution optimized to manage the operation tasks remaining with the customer
- Transition to SAP Cloud ALM can be achieved faster for Operations compared to Implementation

Operations Implementation
