

Moving to the Cloud

Is it really different from any other implementation?

The People Side of Change

Chris Olofsson Gaudums, Stretch Evolve

What does it imply?

- Where the software is stored
- From choice of system to holistic service
- IT operations by software vendor
- Role of IT changes – rather than end-users
- Web-based logon – different/more intuitive UX
- Security aspects
- Idea of standard is old – recognition of TCO
- An opportunity to innovate faster; it depends...

12 Key Aspects to Consider

Affecting the people side of change...

- A different flavor with Cloud
- Always valid

Accentuated with Cloud

1. Why transition to the Cloud and change system?
2. Adopting a Cloud Mindset
3. How custom-developed or unique is your current solution?
4. Fast & Furious – how so?
5. Define Your MVP
6. Solution Validation
7. Test Automation

Always Valid

8. Take full ownership of your success
9. Define target - what does good look like?
10. Dedicated "champions" from the start
11. Focus on interfaces and critical integrated systems
12. An opportunity to start fresh!

In Summary

Take ownership – equip yourself with knowledge and experience to do so

Define the **why and the what** - and what it means for different user groups

Designate **ambassadors** who can drive and work the change

A bright sun shining through a blue sky with scattered white clouds. The sun is positioned in the upper center, creating a lens flare effect. The clouds are fluffy and white, scattered across the blue sky.
