# Understanding the Agent-led Toolchain

Letizia Ciaccia, Strategic Solution Advisor BTM EMEA

November 2026

# SAP Autonomous Enterprise

# HOW to get there?

To innovate and drive value.

# From Legacy ERP to Autonomous Enterprise.

## A single, structured approach, built to run agent-led transformation

Agent-led transformation

Legacy ERP

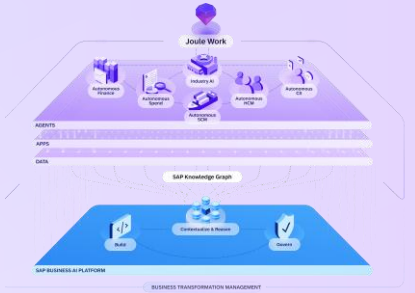

Overcome transformation debt faster

Your potential to innovate

Realized value

Autonomous Suite

# **Two silo problems: Isolation within. Disconnection between.**
Both compound and both break transformation

## People

- Digital skills gap
- Change resistance
- User experience and support costs

## Processes

- Outdated processes
- Legacy dependencies
- Compliance issues

## Applications

- Legacy systems
- Technical debt
- Integration challenges

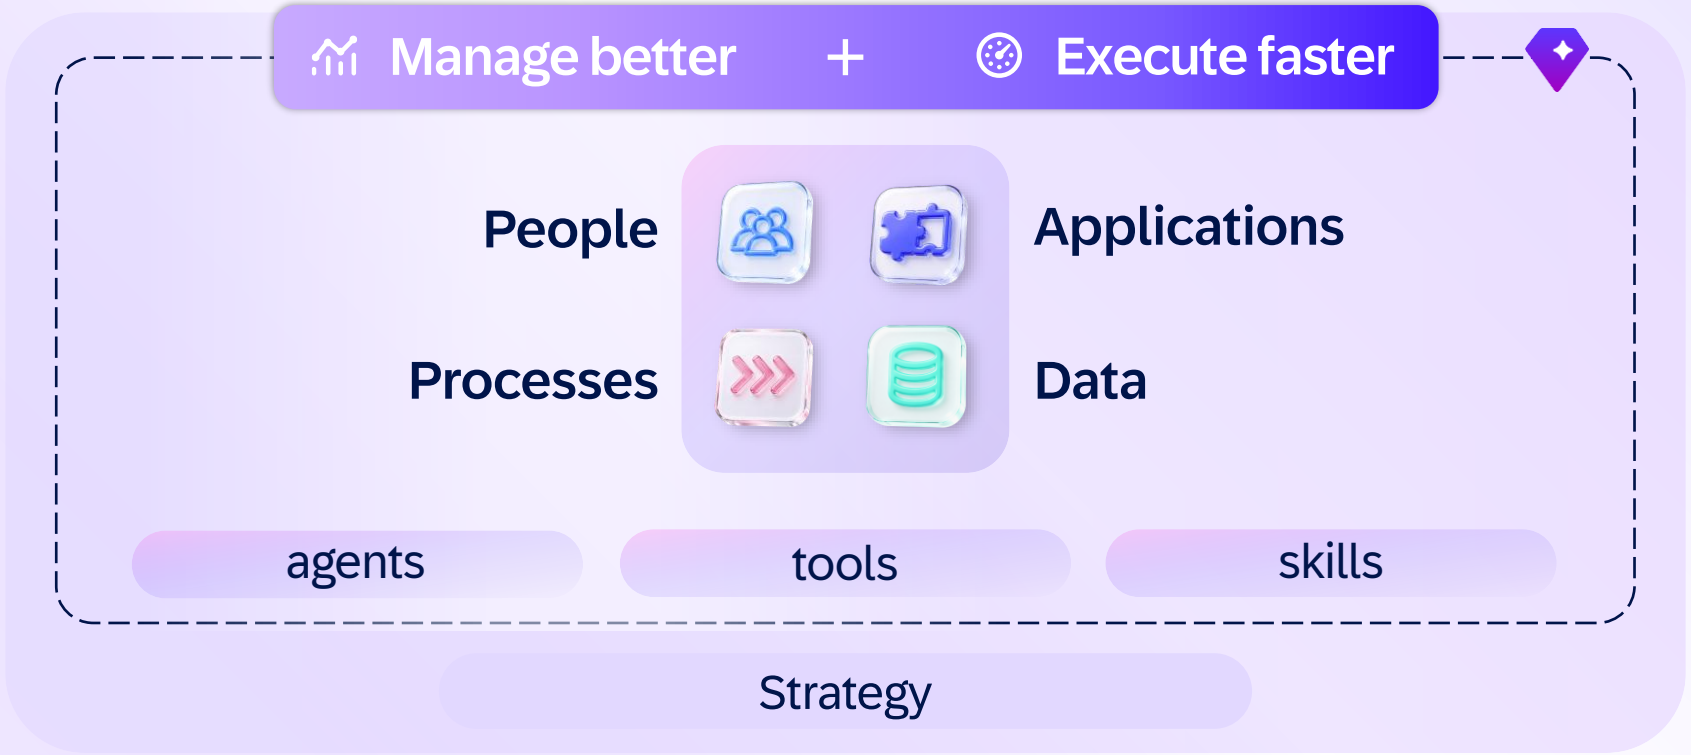

## Data

- Data silos
- Data quality issues
- Data security and compliance

# From disconnected dimensions to one connected transformation

When everything works as one, transformation delivers

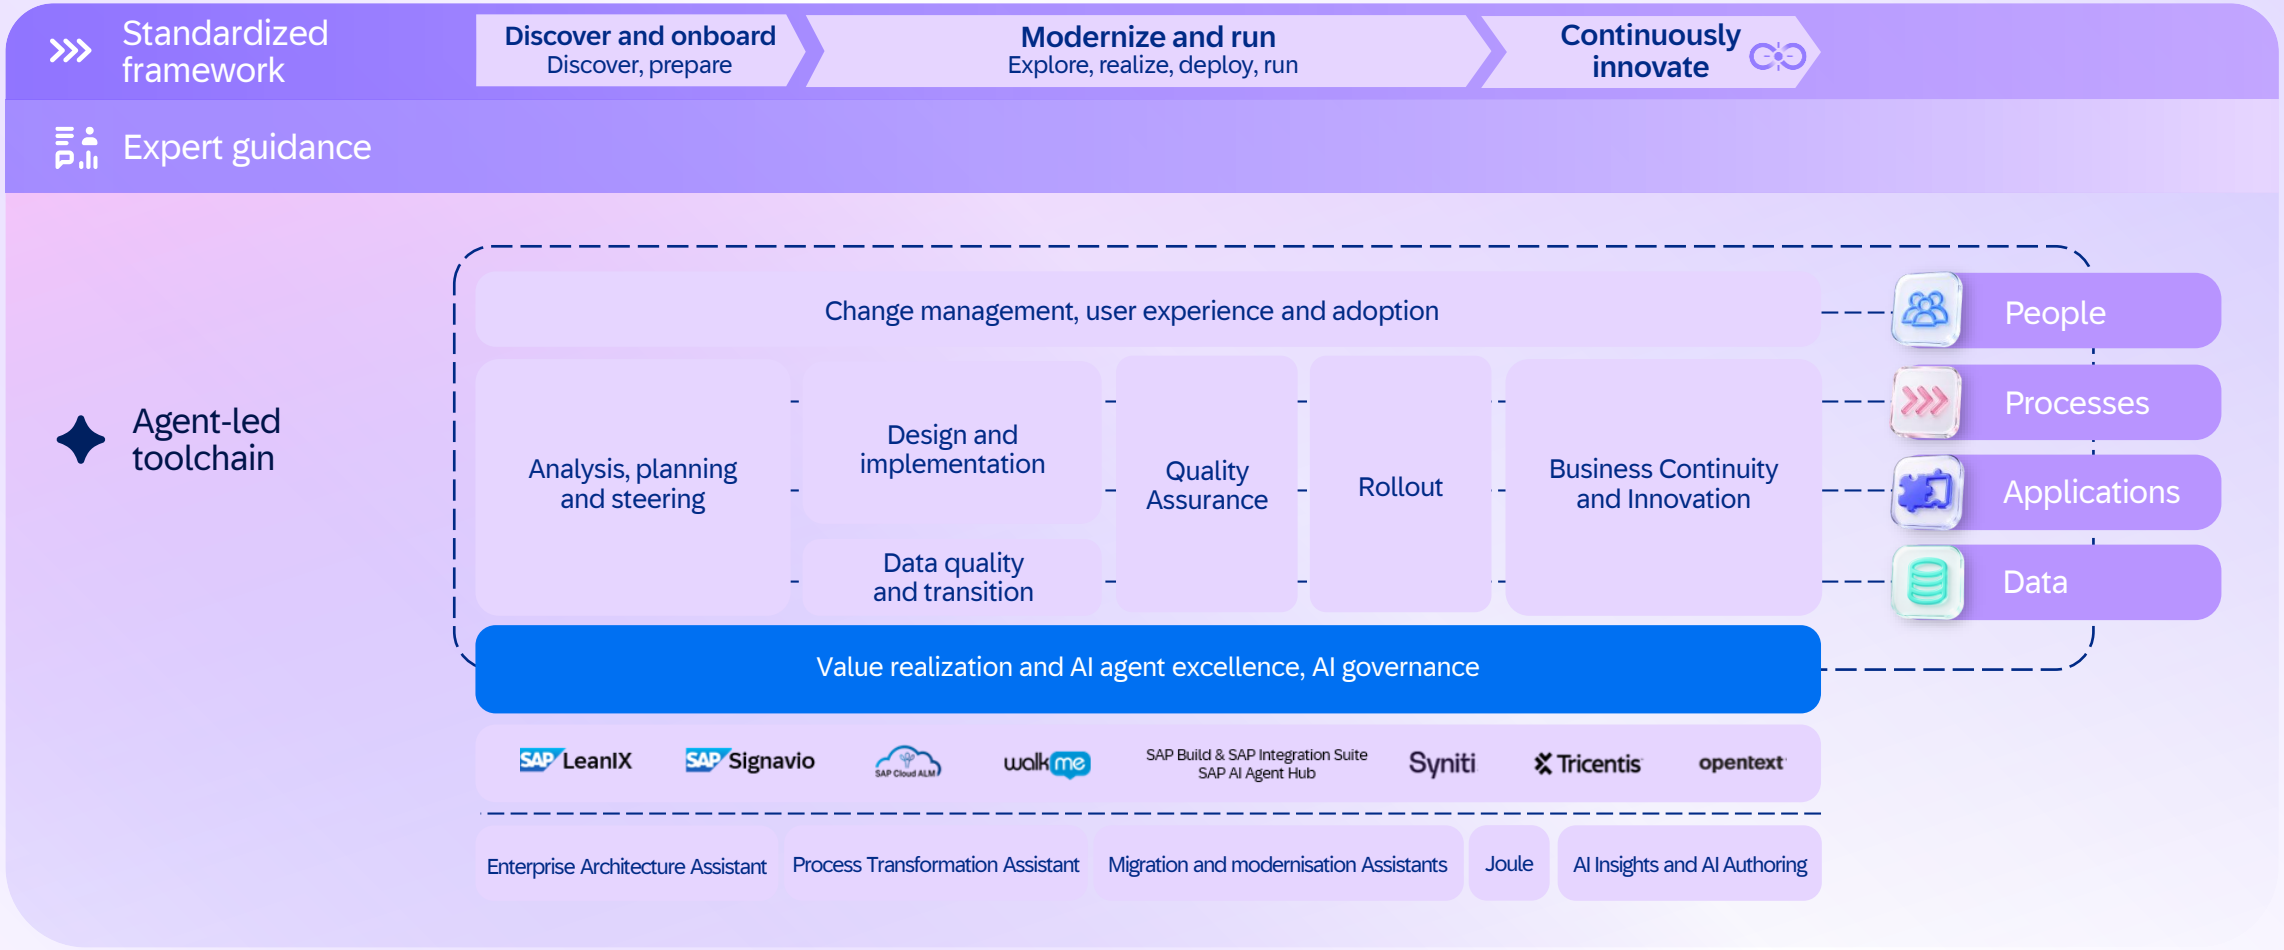

# Agent-Led Transformation

## Driving business value and accelerated transformation with RISE with SAP Methodology

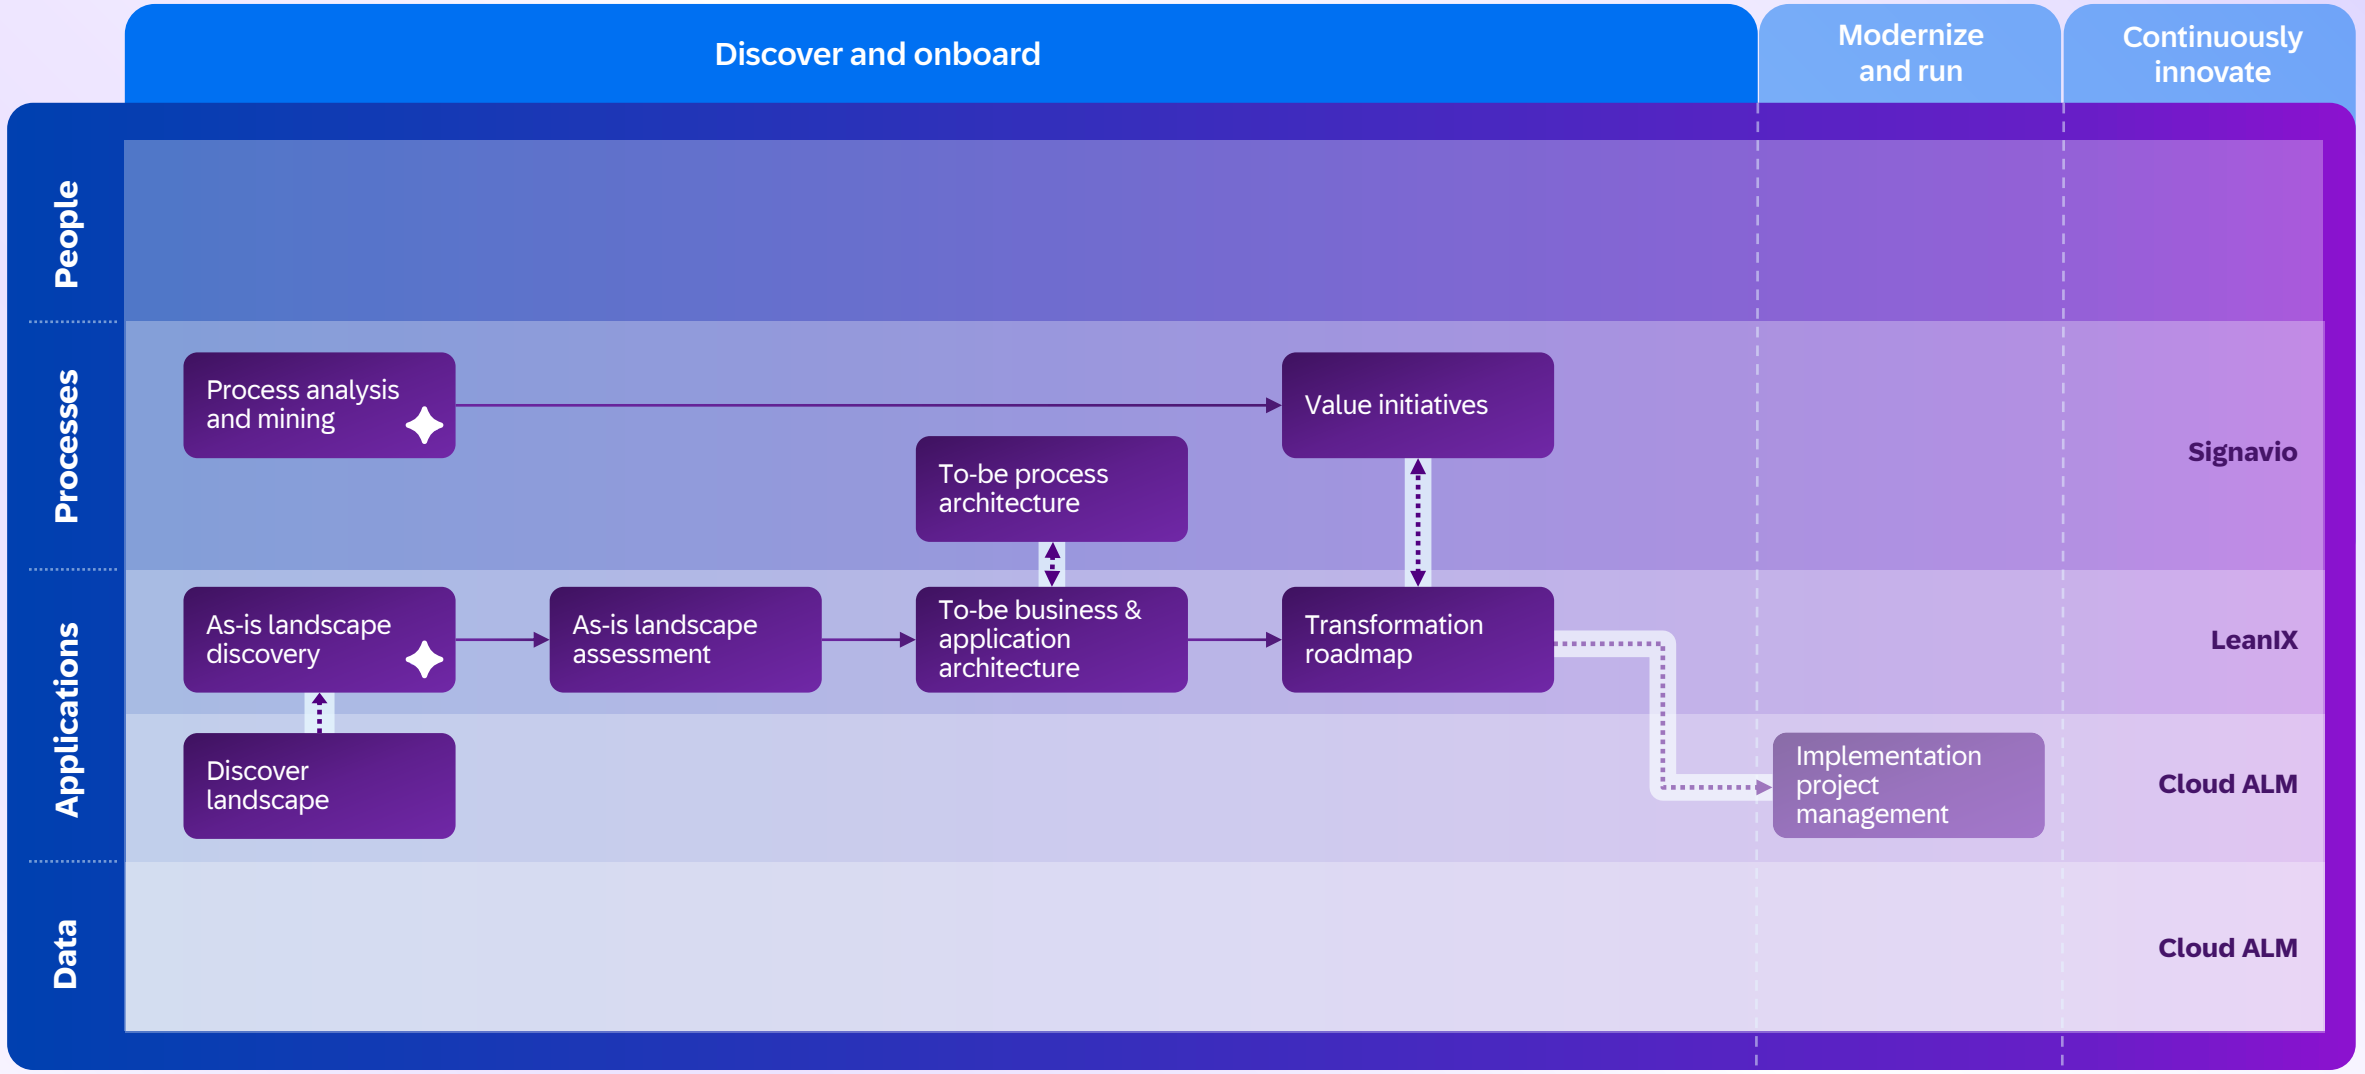

# From transformation journey to transformation capability

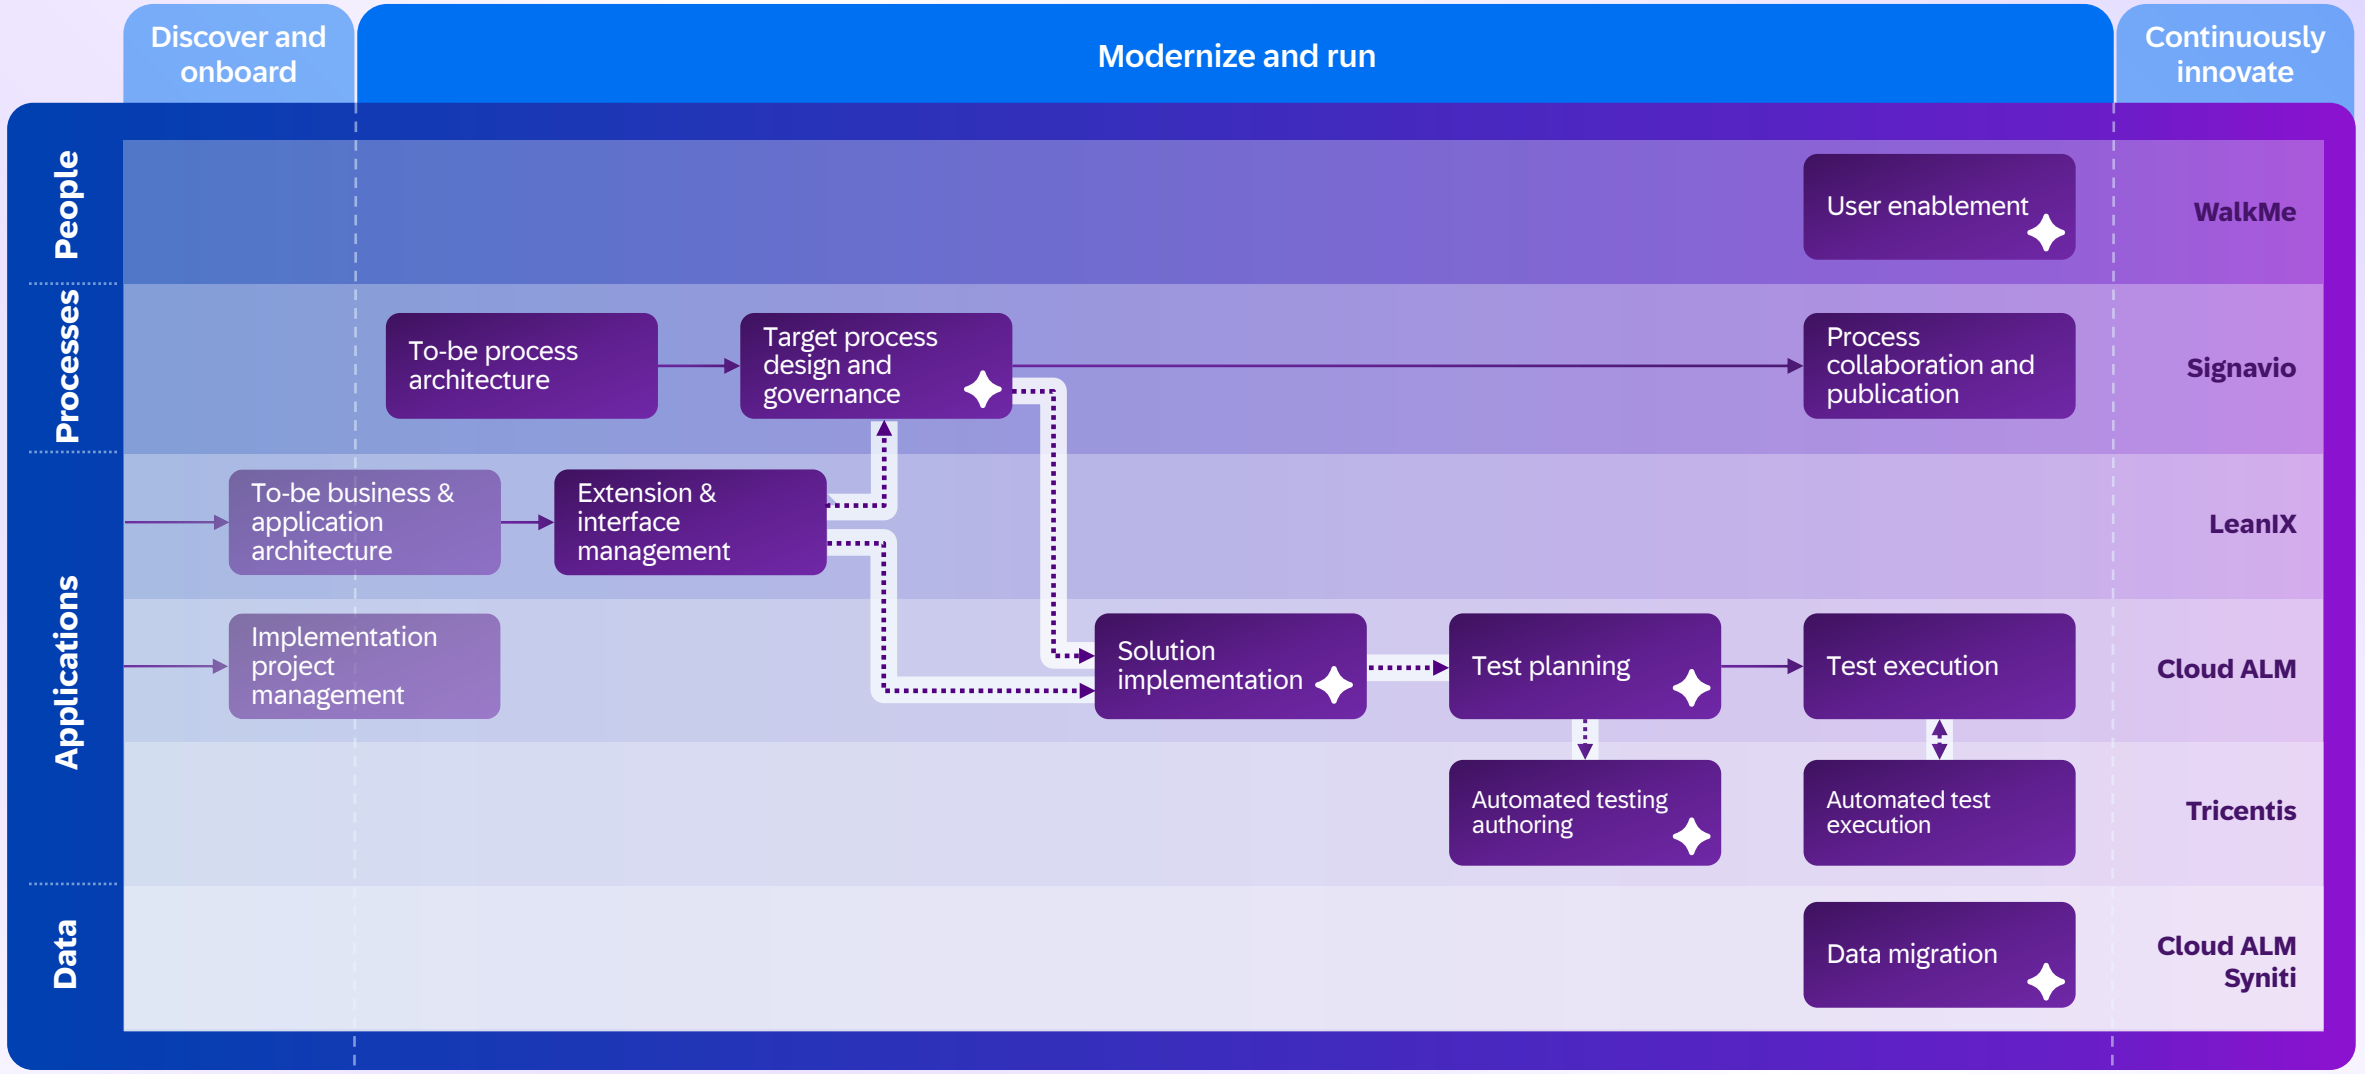

## One connected foundation for continuous transformation

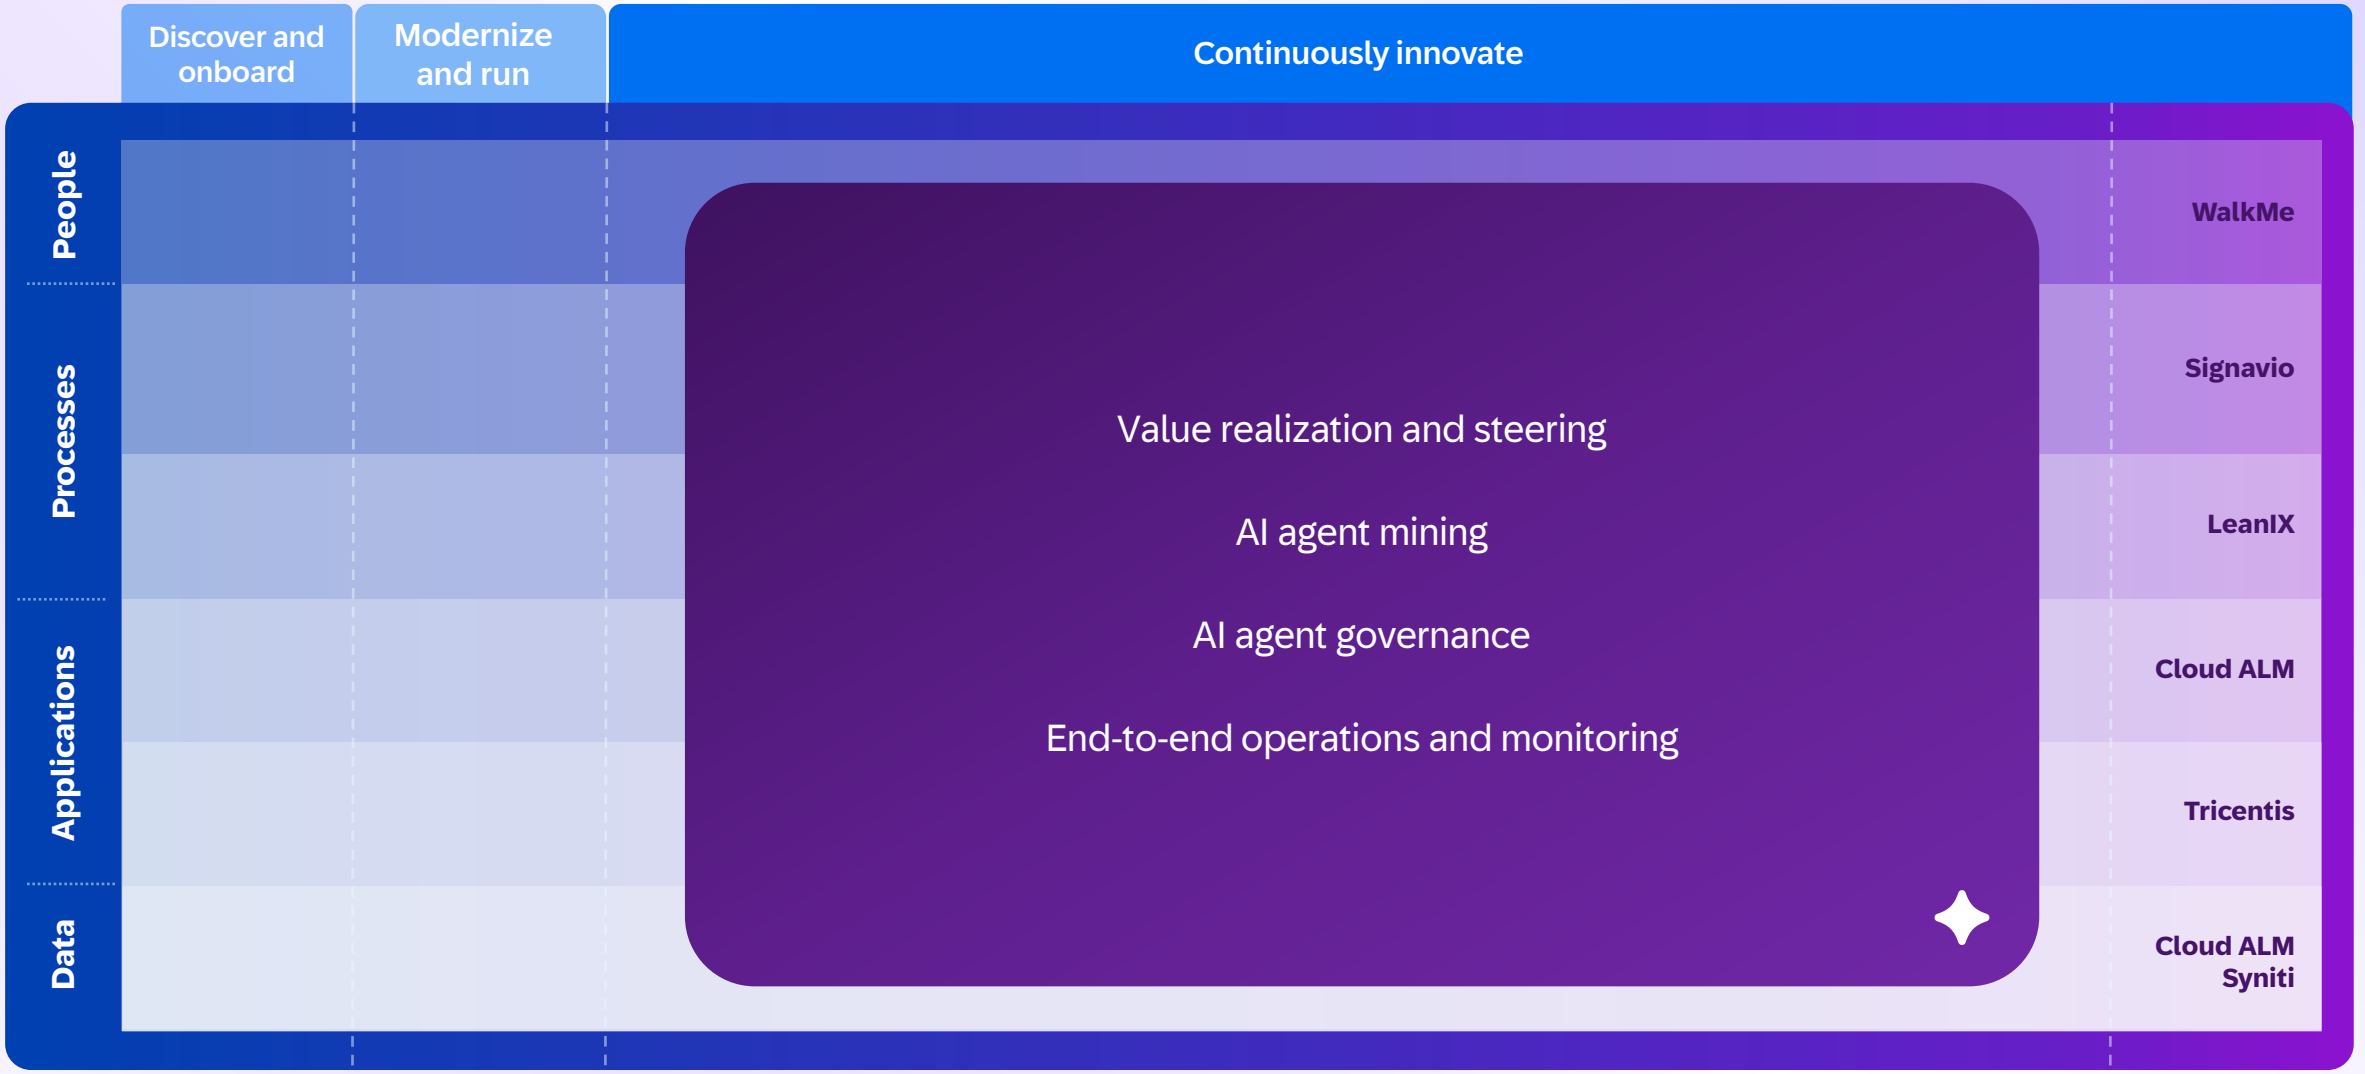

# Discover and onboard

# Modernize and run

# Continuously innovate

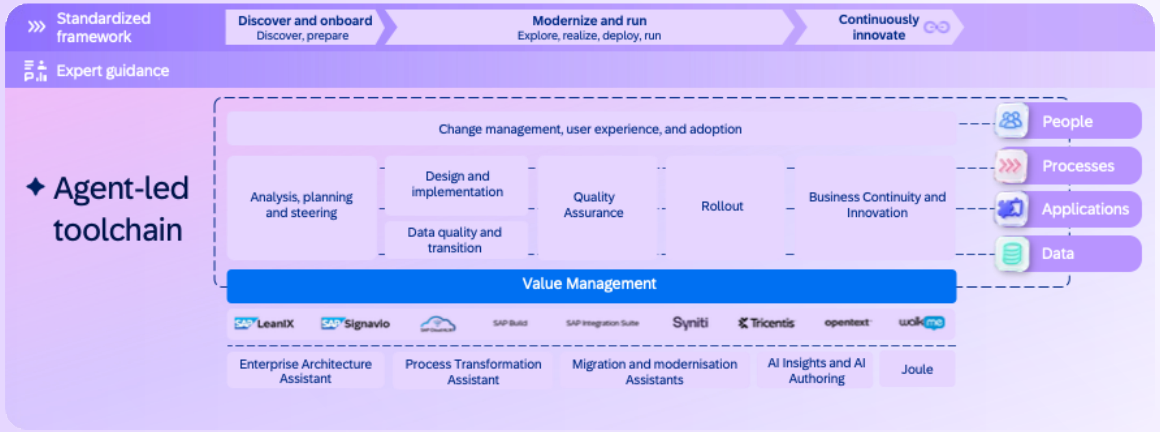

# Demonstration

# RISE with SAP. Agent-Led. Like Never Before.

Unlocking speed, value, and transformation at a new level

## With an agent-led toolchain

- Unleash a transformation strategy that delivers
- Manage and execute transformartion end-to-end
- Connect every dimension into a unified source of truth
- Proven best practices, combined with real-time, data-driven insights
- Agents that work hand in hand with software and humans
- Business and transformation value from day one
